LIST OF SEEDS

NATIVE TREES, SHRUBS, VINES AND WILD FLOWERS

The following list, as long as the supply lasts and unless otherwise priced, will be furnished at 10 cents per packet, or 12 packets for \$1.00. As the supply of many kinds is limited, alternatives should be included in the order. Those that can not be furnished will be replaced with other kinds, duplicates of those furnished, or by refund, as desired. When available the seed can often be furnished in quantity at prices ranging from 50 cents to \$2.50 per ounce and \$2.00 to \$15.00 per pound, depending upon the size of the seed and difficulty in obtaining.

As most wild flower seed is much more difficult to germinate than the seed of cultivated plants no guarantee as to germination can be given. Circular 15 sent with all seed orders, or furnished separately for five cents, gives all directions at present available.

A large collection of California wild flower seed is available from western correspondents at 15 and 25 cents per packet.
